

# Safe and environmentally friendly CT couplings

Newsletter 6-2013

PMC hereby presents the new stainless steel clean-break quick coupling from Walther Präzision. The CT series is compatible with both non-lubricating and lubricating fluids – safely and extremely environmentally friendly.

The customers' experiences and feedback confirm the CT series' excellence and advantages.

Technical features that have led to the customers' choice of CT couplings:

- Connection is fast and safe with automatic locking
- Very little pressure drop due to unique design. Minimal spillage when connecting/disconnecting, making the design environmentally friendly.
- Customised threading can be delivered
- Available compatible to ATEX and TA regulation compliant.

Areas where the CT series is used by our customers:

- The mechanical and hydraulic industry
- The chemical and pharmaceutical industries
- Food industry

New product variations that we have developed for our customers:

- Large 19mm bore version now available with ring handle.
- All sizes are compatible with both non-lubricating and lubricating fluids, i.e. oil, grease or silicone
- CT 'break away' coupling: DN 19 coupling with Clean Break technology as the reliable safety device between stationary and portable tanks.

If you need further information please email [info@pmctechnology.dk](mailto:info@pmctechnology.dk) or visit our stand No. 9856 in Hall M at the HI exhibition from 3 to 6 September 2013.

PMC Technology A/S is part of the leading Scandinavian hydraulics group, PMC Group. In addition to Scandinavia, the group operates in China, the US, India, Qatar and Poland – companies which services are available to our customers and divisions through PMC Technology A/S. In Denmark there are approx. 175 employees, primarily in Soeborg and Esbjerg.

The company has three divisions which handle relations with external customers. Each division offers unique and specialised professional skills, i.e.:

**PMC Windsyn** services all customers, Danish as well as international, within Wind Power Energy.

**PMC Technology** services all industrial customers with hydraulic systems, components, etc. The customers are partly Danish industrial customers and partly international OEM customers.

**PMC Hydropower** services all Off shore and Maritime customers as well as customers requiring service and maintenance.
